Art Unit: 1616

Claims 1-86 are pending.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-85, drawn to compositions and method of use, when X represents CHC(R13YY').
  - II. Claims 1-85, drawn to compositions and method of use, when X represents N
  - III. Claims 1-85, drawn to compositions and method of use, when X represents O
  - IV. Claims 1-85, drawn to compositions and method of use, when X represents S
  - V. Claims 1-85, drawn to compositions and method of use, when X represents CR6'R6.
  - VI. Claim 86 is drawn to packaged material.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I and II-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions they have different designs, modes of operation, and effects.

Claims are drawn to the composition and method of use of large number of compounds containing different heterocyclic groups and non-hetero groups. The hetero ring may be of class 549, 546 and various subclasses of class 552. Each belongs to a different structure and has different properties. They require separate searches and are patentability distinct.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-VI, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising for example compounds of claim 48 and 70. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1616

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
